Roles

Backend – Josiah

Frontend – Ricardo

Database/Backend - Jeff

Base Requirements

1. The solution must be written in C# (.NET 8.0 or higher) using the MVC framework.
2. You may use the MvcMovie walkthrough as a basis for your solution. However, your application will differ in its objective.
3. Your solution is a system to catalog items in a user's place of residence – primarily for insurance purposes.
4. The database in use must be a SQL Server instance (not the localDB used in Visual Studio).
5. The application must be deployed to IIS (not IIS Express).
6. The user is the only person that has access to the data related to their own residence. (There is some authentication and authorization that must take place.)
7. You will need to discuss the solution with your team and come up with additional detailed requirements. Make sure you validate your own requirements with the instructor during the labs that lead up to assignment submission.
8. In a separate PDF document called A04Report.pdf, you must include the full list of your requirements

Requirements

1. Have a login screen for user authentication.
2. Create a DB Schema.
3. Use Authentication classes in ASP.NET to authenticate user using Forms-based Authentication with cookies
4. Create classes for User objects and User item objects as data models for Entity Framework
5. Have a sort of a table where user can view/list their existing items in the database
 - a. User must also have an option to update/delete each item
 - b. Think CRUD
6. Use Entity Framework to map objects into database

Model

- User.cs (Contains session variables)
- UserItem.cs
- AddViewModel.cs
- UpdateViewModel.cs
- LoginViewModel.cs
- ErrorViewModel.cs
- RegisterViewModel.cs
- ProfileViewModel.cs

Views

- Account/Index
- Account/Register
- Home/Index
- Home/Privacy
- Item/Add
- Item/Delete
- Item/Index
- Item/Update
- Profile/Index
- Shared/layout
- Shared/ValidationScriptsPartial
- Shared/Error.cshtml

Controllers

- Account
- Home
- Item
- Profile

Data

- UserContext

Navigation Bar

- Home
- Item
- Login/Register
- If logged in: Logout and View Profile
